# Delta Human Machine Interface DOP-100 Series

[www.deltaww.com](http://www.deltaww.com)

# Advanced Human Machine Interface for

Delta's Human Machine Interface DOP-100 Series includes four categories for different applications: Basic, Standard, Advanced, and Handheld. The Basic, Standard, and Handheld HMI adopt the latest Cortex-A8 (800 MHz), while the 12"/15" Advanced HMI adopts the Dual Core Cortex-A7 1Ghz high-speed processor. The DOP-100 Series employs 16-bit or 24-bit color LCD screens with high brightness and contrast. In addition, the series is equipped with the HMI programming software DIAScreen and built-in Lua editor for easy programming as well as alarm / history log / user authority functions for highly efficient management.

With advanced communication capabilities and enhanced functions, the DOP-100 Series enhances machine efficiency to bring more value to our customers, and to achieve "Automation for a Changing World"!

## Standard HMI

Features General and Ethernet Types for various applications

## Advanced HMI

Features narrow frame design, supports various network communications, multilingual input and multimedia functions

# Easy Model Selection

The DOP-100 Series offers diverse models for different applications. Users can easily select a suitable HMI based on size or function

# Advanced HMI

The Advanced HMI adopts a wide screen and narrow frame design. It supports Ethernet communication & multilingual inputs. The Multimedia Type DOP-112 / 115 offers multimedia functions to meet different applications.

# Features

**Narrow Frame**  
Enlarged visual display for a better user experience

**LUA Language**  
Simple and easy structural programming language to meet various demands

**Pressing Times >10,000,000**  
Effective pressing times validated by strict endurance tests

**IP65 Rating**  
Protects the HMI from rain and dust

**Multilingual Input**  
16 different languages input for easy operation

**Diagnostics Function**  
Collects and troubleshoots issues remotely

**Power Isolation**  
Protects the HMI from accidental surge interference

**VNC Remote Monitoring**  
Remote control with mobile devices

**QRcode Scanning**  
Generates QRcodes for mobile device identification

**Supports GIF Graphic Elements**  
Easy setting to play vivid GIF elements

**Embedded Linux System**  
Open system for flexible and stable program development

**DIAScreen**  
New software DIAScreen offers more functions and a better interface

**Operating Temperature 0°C ~ 50°C**  
Applicable in various industrial operating environments

**CE / UL Certified**  
Compliant with CE and UL standards

**Multimedia Functions**  
Captures images with an external camera or replays important recordings 

**Ethernet Communication**  
Connects to a master device or PLC with high-speed Ethernet communication

**Communication Isolation**  
Serial Communication Ports and Ethernet Ports with built-in isolation circuits enhance communication stability

**OPC UA**  
Supports M2M communication and data transmission among machines from various manufacturers for diverse industries

**FTP/eMail Supported**  
Simple data transmission and real-time status update

**Supports PDF and TXT Reader**  
PDF and TXT files supported

# Camera & Video Play Multimedia Functions

## Analog Camera

Supports external camera via analog signals, suitable for capturing fast and short-distanced images

Applications: Textiles | Pharmaceutical | Rubber & Plastics

## IP Camera

Supports IP Camera via Ethernet, suitable for capturing remote and wide-range images

Applications: Packaging | Logistics | Mining | Power Generation | Oil & Gas

## VGA Input

Displays images from external devices such as machine vision systems, PCs or notebooks

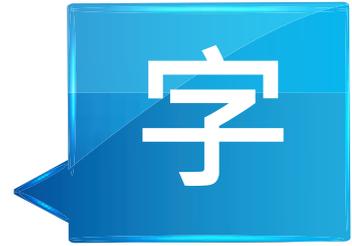

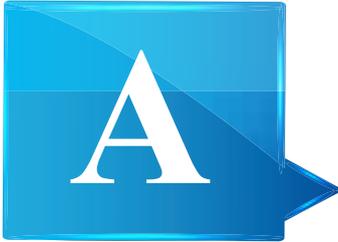

## Video Play

Views mpeg4 files captured by analog or IP camera from internal storage or USB disk / SD card

## Event Trigger

Responds to preset event trigger conditions to capture images and archive as mpeg4 files

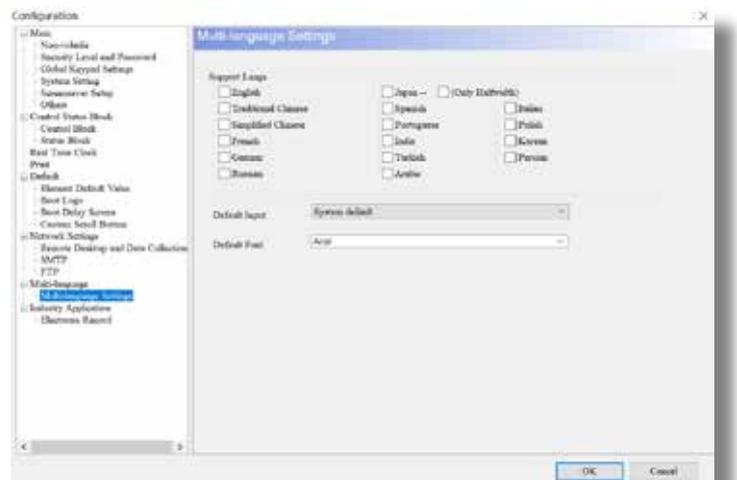

## Multi-Language Input for Localization

▶ The Advanced HMI supports multilingual inputs for:

- Recipe Name (ENRCPG)
- Recipe Group Name (ENRCPNONAME)
- Recipe Content (Char)
- User Name

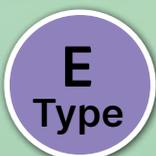

▶ Supports 16 languages: English, Traditional Chinese, Simplified Chinese, French, German, Russian, Japanese (Fullwidth or Halfwidth), Korean, Spanish, Portuguese, Hindi, Turkish, Arabic, Persian, Italian and Polish

Delta's HMI can implement M2M communication and data transmission for diverse industries by means of OPC UA. Communication among different manufacturers' machines is enabled through information modeling.

# Standard HMI

The Standard HMI is equipped with Serial Communication Ports to meet most applications. It also offers Ethernet Types for fast and easy connection with other equipment.

# Features

**Embedded Linux System**  
Open system for flexible and stable program development

**LUA Language**  
Simple and easy structural programming language to meet various demands

**DIAScreen**

**Diagnostics Function**  
Collects and troubleshoots issues remotely

**Ethernet Communication**  
Connects to master device or PLC with high-speed Ethernet communication

**Power Isolation**  
Protects the HMI from accidental surge interference

**Communication Isolation**  
Serial Communication Ports and an Ethernet Port with built-in isolation circuits enhance communication stability

**VNC Remote Monitoring**  
Remote control with mobile devices

**FTP/eMail Supported**  
Simple data transmission and real-time status update

**Supports PDF and TXT Reader**  
PDF and TXT files supported

**Supports GIF Graphic Elements**  
Easy setting to play vivid GIF elements

**User-Friendly**  
Intuitive operation interfaces for users

# Basic HMI

The Basic HMI is easy to install and offers basic functions for general industrial applications. With an IP65 rating, it is suitable for harsh environments.

# Features

**Embedded Linux System**  
Open system for flexible and stable program development

**LUA Language**  
Simple and easy structural programming language to meet various demands

**DIAScreen**

1) The half-life of a backlight is defined as the original luminance being reduced by 50% when the maximum driving current is supplied to an HMI.

2) Built-in power isolation

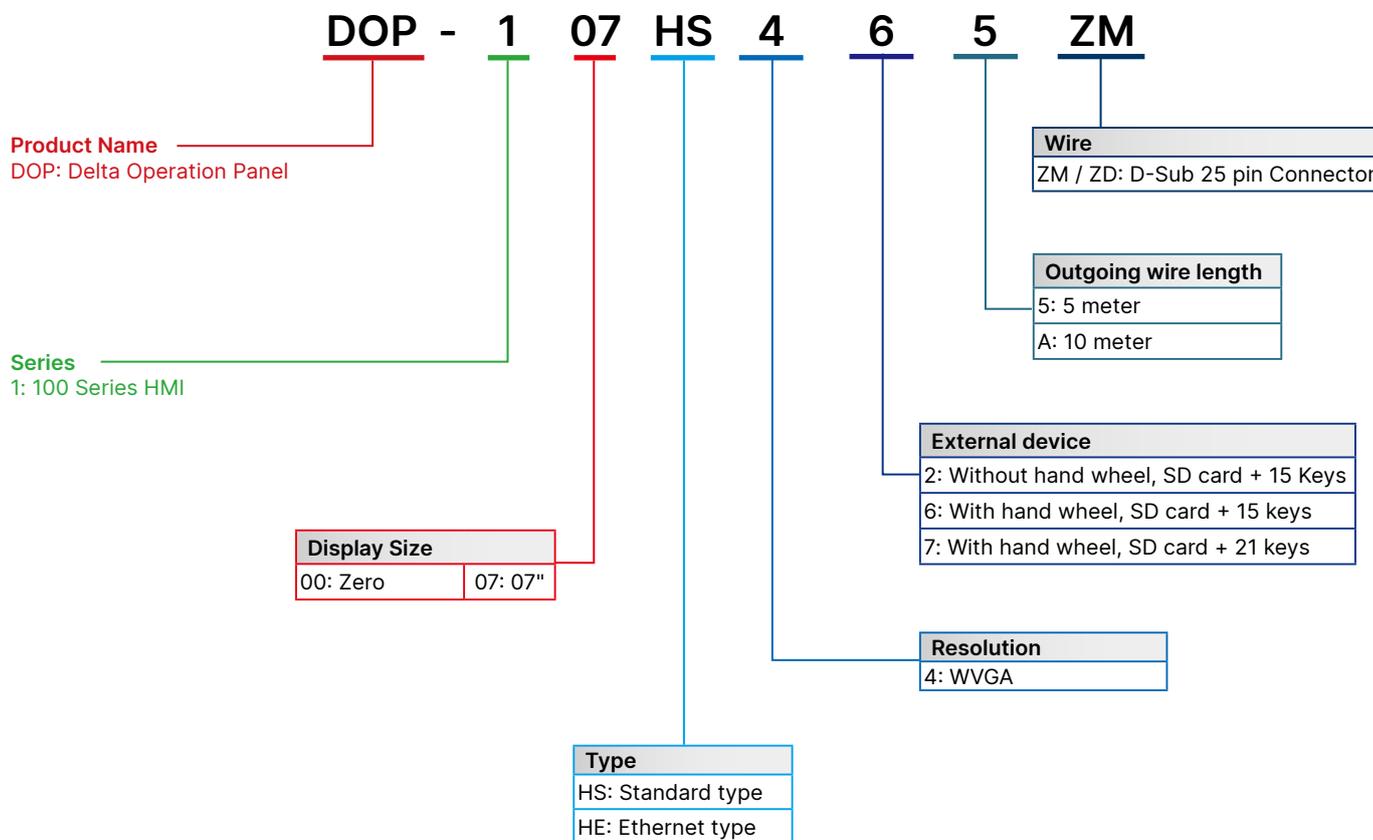

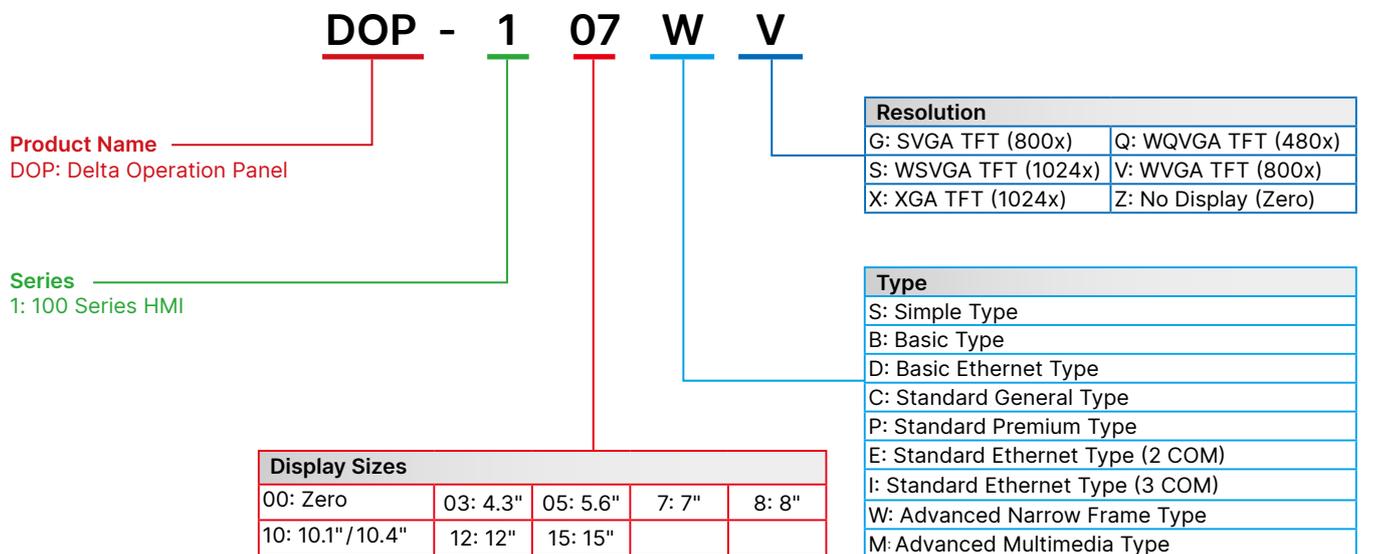

3) An isolated power supply is recommended.

4) Some models are in the process of application for UL and KCC certification. For more information, please consult our distributors.

5) The value of the power consumption indicates the electrical power consumed by the HMI with no peripheral devices connected.

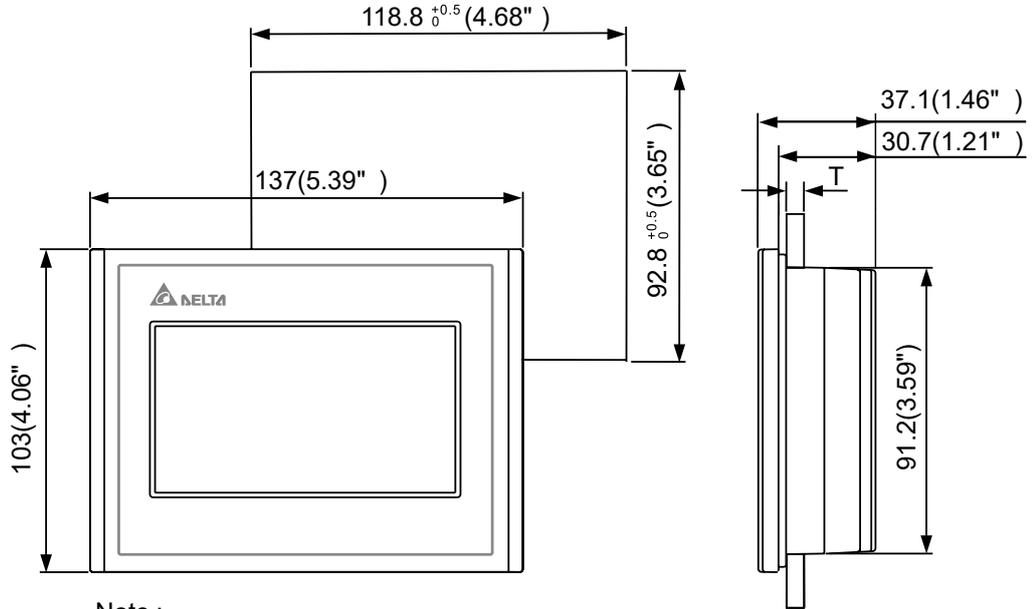

6) The content of this catalogue may be revised without prior notice. Please consult our distributors or download the most updated version at <http://www.deltaww.com>
